HYGIENE SYSTEMS

Dear Customers,

We are pleased to present our new Nexxt product line of professional hygiene solutions such as towel and toilet paper dispensers and refills, soap dispensers and soaps, toilet trash cans and brushes as a complementary range, as well as air fresheners and urinal liners.

Our dispensers, combined with compatible refills, are complete solutions for places where hygiene plays a key role.

Innovation and functionality

Nexxt is synonymous with modernity and high quality in the hygiene industry. The dispensers have been designed with maximum functionality and convenience in mind. They turn every sanitary and hygienic room into a showpiece of the company, reflecting its attention to detail and comfort. Nexxt stands for hygiene.

Modern design and ecology

With the rebranding of the Nexxt brand, our products have a modern look that perfectly matches contemporary aesthetic trends and meets the highest standards of functionality. In addition, our products are environmentally friendly, which is an important aspect for modern companies.

Take a look at the Nexxt product catalogue, where you will find detailed information about our range.

Premium

The Nexxt Premium line perfectly combines modern style with advanced technology for the ultimate in user comfort. It is a line of dispensers with a minimalist, futuristic design. They give a touch of luxury that enriches any interior. Within the Premium line, we offer a full range of bathroom accessories such as soap dispensers, paper dispensers, trash cans and toilet brushes.

Premium is a line available in four colour variants:

- ✔ **black:** slightly satin black, adding elegance and modernity,
- ✔ **white:** classic and timeless, suitable for any interior,
- ✔ **sandy:** delicate, with a grainy texture, conducive to creating a cosy atmosphere,
- ✔ **graphite:** elegant and refined, perfectly highlighting prestige.

Specifically designed for high and medium traffic bathrooms. Dispensers and dispensers combine aesthetics with practicality, ensuring not only exceptional performance but also meeting the highest hygiene standards. Transparent housing elements facilitate handling and immediately signal the need to replace the refill. Where fast response is important, our solutions are irreplaceable.

Economy

Introducing the economical Nexxt range of dispensers, which combines simplicity and functionality to offer excellent value for money.

In the Economy version, we offer the dispensers in two classic colour variants:

- ✔ **black:** elegant and modern, bringing a touch of modernity to any interior,
- ✔ **white:** versatile and easy to blend into any setting, ensuring freshness and cleanliness.

The dispensers are designed for everyday challenges, combining minimalist design with practical solutions. They offer reliability and ease of use. They are ideal for places where every detail is important. Our economical dispensers are not only affordable, but also feature high quality workmanship for low maintenance costs and maximum user satisfaction. It is the ideal solution for those looking for functionality and aesthetics at an affordable price that simultaneously increases operational efficiency and customer satisfaction.

Paper hand towels

HISTORY OF PAPER TOWELS

The first paper towels were created in the early 20th century by the Scott Paper Company in 1907. They were invented by accident, as a way to stop the spread of germs in hospitals. Since then, paper towels have gained popularity for their convenience and hygiene, becoming an integral part of everyday life.

WHY USE PAPER TOWELS?

Paper towels provide the highest level of hygiene as they are discarded after one use. They are great for kitchens and bathrooms, as they absorb liquids quickly and help to maintain cleanliness without unnecessary effort. **Combined with system dispensers that reduce consumption, they are the perfect solution to support us in an effort to maintain the highest level of hygiene without harming the environment.**

SYSTEM T1 AutoCut - unperforated paper towels and unperforated paper towel dispensers

The innovative AutoCut system for paper towels redefines the concepts of convenience and independence.

BENEFITS

- Exceptional roller efficiency: minimises operating costs and ensures long-term use without the need for frequent replacement.
- Robust dispenser design: guarantees reliable operation over a long period of time, which eliminates the risk of failure and the associated service costs.
- Easy to use: the transparent housing elements of the Premium range dispensers make it easy to monitor the contents without having to open the device, saving time and resources.

The Nexxt AutoCut is the ideal solution for high-traffic areas, combining efficiency with economy.

The optimum solution and maximum performance for busy toilets. Check and test!
1 pack of T1 towels = 3 to 5 cartons of T3 ZigZag towels.*

*Example comparison: : Product consumption may vary depending on a number of factors, such as material type, grammage, sheet size, installation method, dispenser type and building specifics.

Additional benefits

- Economical and ecological: using our solutions reduces transport, storage and logistics costs thanks to compact rolls and efficient dispensing.
- Optimal use: single leaf dispensing reduces towel consumption, leading to less frequent refilling and reduced operating costs.
- Less waste: lower consumption means less packaging and waste, translating into less burden on the environment.
- Efficient operation: the transparent elements of the premium dispensers allow easy monitoring of the refill status without having to open the device, which saves time.
- High standard of hygiene: our dispensers ensure hygienic and convenient dispensing of towels, increasing user satisfaction.

SYSTEM T2 TakeOne - perforated paper towels and centrefeed dispensers

A system designed to maximise savings and efficiency where economy is key.

BENEFITS

- ✓ **Precise dispensing:** the TakeOne system allows the towel leaves to be dispensed one at a time, which reduces consumption and waste.
- ✓ **Robust design:** a guarantee of long-term trouble-free operation and low operating costs.
- ✓ **Easy to operate:** the transparent housing elements of the Premium line dispensers allow the refill status to be monitored without opening the unit.
- ✓ **Hygiene:** centrefeed dispensing ensures a high standard of hygiene and convenience.

Nexxt TakeOne is the ideal solution for high-traffic areas, combining efficiency with economy.

Toilet paper

HISTORY OF TOILET PAPER

Toilet paper as we know it today originated in the 19th century, although earlier forms appeared as far back as ancient China. **The first commercial toilet paper was launched in 1857 by Joseph Gayetty in the USA.** Over the years, the product has evolved, becoming softer, more absorbent and available in different variants to meet different user needs.

ADVANTAGES OF MODERN TOILET PAPER

Today's toilet paper is a product designed for comfort and hygiene. **Thanks to innovative technologies, it is softer, more durable and more absorbent.** In combination with system dispensers, you can control the amount of paper used.

SYSTEM P4 Mini Jumbo - roll toilet papers
and roll toilet paper dispensers

The Nexxt Mini Jumbo Universal Toilet Paper Dispenser is a commonly used solution in many toilets.

BENEFITS

- ✓ **Large capacity:** holds long rolls of toilet paper, reducing the need for frequent changes.
- ✓ **Robust design:** guarantees long-lasting operation and low maintenance costs.
- ✓ **Easy to operate:** the transparent housing elements on the Premium line dispenser make it easy to monitor the refill, saving time.
- ✓ **Ease of use:** easy access to paper increases user convenience.

The Nexxt Mini Jumbo dispenser is the ideal solution for high-traffic toilets. It combines hygiene with efficiency and low costs.

Hand hygiene

FROM THE TRADITIONAL BAR TO MODERN DOSING SYSTEMS

Soap as we know it today has a long and fascinating history, dating back to antiquity. The first **evidence of the use of soap dates back to Mesopotamia around 2,800 BC.** In those days, mixtures of fats and ash were used which, when in contact with water, formed a solution with cleaning properties.

Over the centuries, soap has evolved. In medieval Europe, it began to be produced in bar versions. It became popular due to its effectiveness and ease of use. A key moment in the history of soap was the introduction of a production method based on vegetable and animal fats, which improved quality and availability.

Today, it comes in various forms, with liquid and foam soap at the forefront. **Modern dispensing systems, such as dispensers, make it possible to measure soap precisely. This not only increases hygiene, but also saves money and reduces waste. These innovations have made the use of soap even more convenient and efficient, combining tradition with modernity.**

SYSTEM S4 - Foam soaps and foam soap dispensers

The elegant and functional Nexxt Premium Foam Soap Dispenser offers the ultimate in simplicity and guarantees hygiene in your bathroom.

BENEFITS

- ✔ **Elegant design:** the dispenser's modern look fits into any interior.
- ✔ **High hygiene:** disposable foam soap refills protect the contents, minimising the risk of contamination.
- ✔ **Efficacy and safety:** dermatologically tested soap ensures safe hand washing.
- ✔ **Robust design:** guarantees long-lasting dispenser performance and reduces servicing costs.
- ✔ **Easy to operate:** the transparent housing elements of the Premium line dispensers allow the refill status to be monitored without opening the unit.

SYSTEM A2 Airfresh OneShot
- air freshening

Nexxt Airfresh is an innovative product that combines the function of an air freshener and an odour neutraliser. One short press of the OneShot diffuser is enough for the fresh aroma to immediately spread throughout the room.

This effective neutraliser will work well in larger utility spaces such as gyms, changing rooms, toilets or entrance lobbies where unpleasant odours can accumulate.

BENEFITS

- ✔ **Instant refreshment:** one puff is all it takes to instantly fill a space with freshness, without the need for complicated dispensers.
- ✔ **Effective odour neutralisation:** fast and effectively eliminates unpleasant odours, bringing freshness to any room.
- ✔ **Versatile use:** ideal for places such as hotels, offices, restaurants, schools and more.
- ✔ **Range:** provides complete refreshment even in very large rooms thanks to the high application pressure.

SYSTEM U1 FRESH & CLEAN - scented
urinal mats

Scented urinal mats that give a pleasant fragrance and cleanliness, are designed to provide superior hygiene and eliminate odours in any toilet.

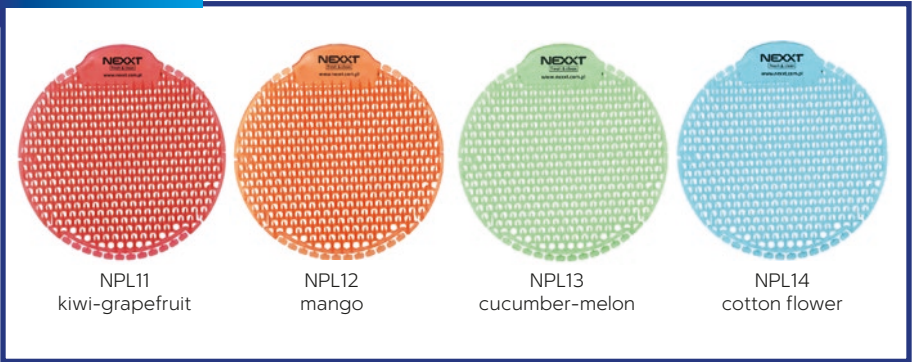

BENEFITS

- ✔ **Odour neutralisation:** thanks to active bacterial enzymes, the pads effectively remove unpleasant odours and clean the inside of the urinal, ensuring freshness for at least 30 days.
- ✔ **Spatter elimination:** special shaped bristles on the surface of the mat reduce spatter by 90%, helping to keep the entire room clean.
- ✔ **Drain protection:** the mats act as a strainer, preventing waste such as chewing gum, cigarettes and tissues from entering.
- ✔ **Ease of use:** flexible design with double-sided bristles makes it easy to position it in the urinal or adapt it to the shape of each bowl.
- ✔ **Long-lasting freshness:** the product is highly effective, emitting more than twice as many active ingredients as competing products.

Nexxt and ecology

Our hygiene products are environmentally friendly and made from FSC-certified paper, which confirms that the raw materials only come from verified sources. In addition, we strive to reduce CO₂ emissions and waste to minimise the negative impact on our planet.

- ✓ The vast majority of our hygiene products are made from **FSC-certified paper**, so we can be sure that the raw materials only come from verified sources.
- ✓ **Nexxt's cost-effective products mean less packaging and waste, reducing negative environmental impact.** Our solutions help reduce the amount of waste produced, supporting sustainability.
- ✓ Greater product efficiency translates into lower transport, storage and logistics costs. This reduces the number of shipments, leading to lower CO₂ and more efficient use of resources. As a result, **our products not only optimise operating costs, but also support environmental activities, reducing the adverse impact on the planet.**
- ✓ Also, the use of **Nexxt's cost-effective solutions** reduces cleaning staff time and refill frequency, as they last longer. This translates into **lower operating costs** for cleaning and less use of cleaning products.
- ✓ Single leaf dispensing systems help to **reduce product consumption**. This guarantees savings, as users only use as much as they actually need.
- ✓ **Nexxt single-ply paper towels do not have an additional adhesive layer like other multi-ply paper towels.** In the latter the adhesive limits absorbency, which translates into lower efficiency. It can also make the towel hard and consequently make the dispensers wear faster.
- ✓ One layer of towel on a roll means more towels on the roll and greater efficiency. **With one absorbent layer of cellulose, the towel is efficient, strong and durable.** Despite this, our towels can effectively handle wiping, leaving no moisture or dirt.

How to purchase Nexxt dispensers?

To simplify the purchase of Nexxt dispensers, we offer you several flexible purchasing options through our network of authorised distributors.

PURCHASE OF DISPENSERS

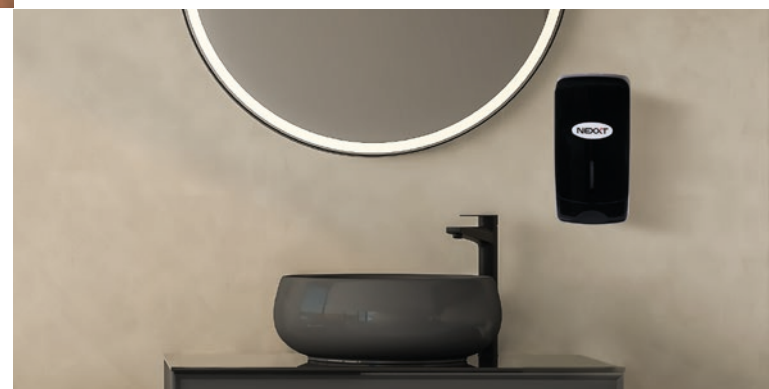

- ✓ Our customers can purchase Nexxt dispensers directly from authorised distributors. It is possible to make a one-off purchase of the device without additional obligations. Without being bound by a contract, you can immediately enjoy the high quality of our products. In addition, we offer a wide range of Nexxt refills that are compatible with our dispensers, providing a convenient and comprehensive supply. For more information on available models, prices and matching refills, simply contact Emerson Polska customer service or your chosen Nexxt distributor.

RENTAL AGREEMENT

- ✓ For customers who prefer a more flexible approach, we offer the possibility of renting Nexxt dispensers. As part of the rental agreement, the customer undertakes to purchase a minimum number of refills throughout the duration of the agreement. This solution allows the use of modern dispensers without the need to incur purchase costs to own the device while ensuring constant access to the necessary consumables.

CYCLICAL AND INDIVIDUAL SPECIAL OFFERS

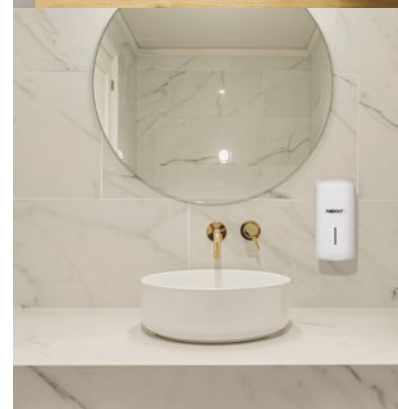

- ✓ We also do cyclical and individual promotions where you can purchase Nexxt dispensers at even more favourable prices. To take advantage of such an offer, please purchase a certain number of refills at one time. Details of current special offers are available from our authorised distributors. We encourage you to contact us regularly to keep up to date with the latest offers and promotions.

Testing Nexxt dispensers

We invite you to test Nexxt dispensers in your company to see for yourself the benefits of changing hygiene solutions. The testing process is simple and involves several steps. This will enable you to assess the quality and functionality of our products.

- ✔ **CONTACT US:** contact our customer service department or an authorised distributor to request a test dispenser. You can do this by phone, email or via the form on our website.
- ✔ **DISPENSER SELECTION:** together we will select the dispenser model that best suits your needs. Depending on your preferences and requirements, we can suggest different types of dispensers that will best suit your bathroom, toilet, kitchen, etc.
- ✔ **DELIVERY AND INSTALLATION:** we will hand over the dispenser for testing together with installation instructions. The installation of the unit is the responsibility of the customer. During the test, refills will be available for purchase from your Nexxt product supplier.
- ✔ **TEST PERIOD:** the dispenser will stay with you for a fixed test period, usually lasting between one and three weeks. During the test period, you will have the opportunity to see how the dispenser works on a daily basis and whether it meets your expectations. Throughout the test period, we are available to answer any questions and provide support.
- ✔ **EVALUATION AND DECISION:** at the end of the test period, we will contact you to get your feedback and answer any questions you may have. If you decide to buy or rent a dispenser, we will present the most favourable options.
- ✔ **AVAILABILITY OF DISPENSERS:** due to the high interest in the test option, some dispensers may not be available off-the-shelf. If this is the case, we will suggest the most similar alternative or inform you of the expected availability date.
- ✔ **PURCHASE OF A DISPENSER AFTER TEST:** We often supply brand new dispensers for testing. If the customer decides to buy them afterwards, they do not have to be dismantled. Simply complete the formalities to simplify the whole process and move on to the cooperation phase.

Label guide

System designation

The marking of the system helps to match the correct hygiene refill to the dispenser. Time is of the essence in business, which is why our solution facilitates rapid product identification.

Premium or Economy products?

Another step that supports quick product identification is the colour scheme of the labels and packaging. Premium products have a distinctive dark blue layout. Economy products, on the other hand are labelled in cream colour.

Coding system

Simple alphanumeric coding ensures that the product is easy to find, both in the catalogue and on the website.

Product features

Modern icons placed in the central section of the label and packaging make it easy to quickly find the most important product features and parameters.

Many languages

The new Nexxt labels are designed not only to attract attention, but to clearly provide information about the product. The text has been translated into 18 languages. However, the basic name is given in Polish and English.

EAN barcodes

Clear EAN codes in the European standard can be read by all readers in the company without problems.

Braille language

Each product is marked with a QR code in Braille so that blind people can easily identify it and learn more about it. The bold and enlarged font on the label makes it easy to read the product name and quickly identify its purpose.

QR codes

Each product is marked with a unique QR code that redirects directly to its description on the website. There you will find detailed information on the product and you can download the necessary materials.

Certificates

Current certifications and environmental information are always included in the bottom section of the label.

New products from Nexxt!

We are always keep up with trends and market needs. We systematically introduce new products to bring you the latest and most innovative solutions.

To make sure you don't miss our updates and keep track of the latest offers, visit our website and scan the QR code below.
